

**The Virginia LeMay Stender Collection** consists of a number of large plastic bins identified by an alphabetical arrangement of letters, A-Q, a total of 27 bins. The collection, boxed after her death, may not retain her original organization. Boxes contain notebooks identified by the names she provided. These have been alphabetically ordered within storage boxes in the Fiske Library to facilitate cataloging them. She was a member of more than a dozen lineage societies so boxes contain membership proofs as well as computer print outs going back into early Medieval and royal lines. Many notebooks contain photo copies or computer printouts of these families and may duplicate materials that may now be obtained elsewhere, or on line.

Her main work seems to be a book on the Veale family, compiled and typed by Robert L. "Bob" Veal. It is in three sections:

1. *The Veale of Gulval*
2. *The Descendants of Christopher Veal*, 1987, 2003, 2006
3. *Members of Veale of Gloucestershire, England*

A notebook containing this manuscript is stored in Box H.

Box K also contains a pedigree printout of Virginia LeMay's ancestry

Box M also contains a pedigree, and a full notebook on her brother, Harold Eugene LeMay of the LeMay Automobile Museum in Tacoma

Box Q contains an Ahnentafel chart for Virginia LeMay back some 22 generations to Plantagenet lines. The notebook is titled LeMay, Kin of Virginia LeMay.

## Stender Collection

### Box A.

Box A contains a dozen standard notebooks labeled with surnames or location of Stender's research. She collected many facsimiles of journal articles and computer printouts of surnames in her pedigree, but, unfortunately, did not always provide links to these early lines that so intrigued her. The notebooks do bring together much research on the particular names she researched. Notebooks in this first box are labeled as follows with a brief description of the contents of each book. Additionally, there is a small notebook on the Prescott Family.

Unfortunately, the book titles do not always reflect the contents of the notebooks. Others contain various articles photocopied from journals that have been included under the appropriate surnames. Though no original research is presented, collections of published articles may be helpful. Box D contains 6 slim, 3/4" ring binders containing Wikipedia printouts of early royal biographies. The larger, 1-1 1/2 inch binders. are more typical of her collection, tracing the royal names of her New England ancestors.

### Box J.

This box contains 13 notebooks, labeled with the major surname or surnames it contains. The notebooks are arranged in alphabetical order, but the relationship they have to one another is unclear. Again, the lineages reflect Stender's interest in Royal lines, more than the research necessary to connect to them.
